Contact Us for a Quote

The innovative ATHENA 1490 self-propelled tracked scissor lift with patented self-levelling technology overcomes the standard limitations of traditional equipment.

Features:

- 14m working height
- Travel height 9.2m
- 400kg deck capacity
- 2.32m x 1.57m deck dimensions
- Front to rear longitudinal levelling up to +/-15 degrees
- Lateral levelling up to =/-14 degrees
- Diesel 23.9 HP Yanmar
- Anti-entrapment system
- Ultrasonic anti-collision system

Specifications:

Basket Levelling: Automatic
Max Basket Height: 14m
Undercarraige: Bi-Levelling
Gradeability: 25 degrees
Side Slope: 21 degrees
Length: 3.02m
Width: 1.69 - 2.03m
Min Height: 2.86m
Weight: 5250kg

Applications:

- Bi-levelling undercarriage allows operation on uneven terrain meaning continuous work flow.
- Ideal for working on steep underground carparks when installing overhead services.
- Perfect for long runs of work with uneven slope along buildings, fence lines, car parks and driveways.
- Cladding, coring, cleaning, painting, signage, plumbing, all while driving at 9.2m and working at 14m.
